11.1 Learning Outcomes 13

11.2 References 13

Chapter 1

Introduction

> "If people knew how hard I had to work to gain my mastery, it would not seem so wonderful at all."
>
> Michelangelo Buonarroti

1.1 Learning Techniques

The following is the five-step Feynman Technique:

1. Choose the topic.
2. Explain it as if you are explaining it to someone with no prior knowledge.
3. Find where your explanation breaks down or lacks clarity.
4. Review the material.
5. Rewrite using language that is easily understood with clear examples.

The following is my own personal process to write my conceptual understanding of the material I learned:

1. Take notes.
2. Question.
   - What are we trying to learn?
   - Why are we trying to learn this material?
   - How will this apply to my overall goal?
3. Extract.
   - Gather information from sources (reading, notes, slideshows, videos, etc.).
   - Pull out information that will help us understand the answers to our questions.
4. Load.
   - Internalize the information and find a way to connect it all together.
5. Transform.
   - Synthesize and re-express the information in your own words.

- Use the Feynman Technique mentioned above to synthesize the information.

6. Teach.
   - Using the Feynman style, try explaining it to a friend and find gaps.
   - Review and refine.

1.2 Pledge of Commitment

Nihil Sine Labore - Nothing without hard work or labor.

Chapter 2

Abstracted View of Selling

> ‘‘All you need in this life is ignorance and confidence; then success is sure.’’
>
> Mark Twain

2.1 Learning Outcomes

2.2 The Sales Process
